Domain Expertise:

Domain	Specific Area in Domain	Experience (Years)
Healthcare Domain	Claims	3
Retail Domain	Retail	0.5
Insurance	PNC	6

Technical Skills:

Operating System:	Windows 9x/XP, DOS
Languages:	COBOL, JCL, Easytrieve, PL1, C++
Database:	DB2, IMS-DB
Tools/Utilities:	File-Manager (IBM), Debugging Tool (IBM), Fault-Analyzer (IBM), FMIMS, Changeman, Tablebase , Control-M,FAID,SAR,Elips,Beta92 , Bagman(version control tool)
Other Skills:	OOPS concept ,CICS,VSAM,TSO, ISPF,MS-EXCEL,MS word,Mail Merge , Jira and Azure board. Git , Visual Studio, Teamcity. Raincode.

Education Details:

Degree	Stream	College / University / Institution	Year of Passing	Percentage
Graduate	BE (Electronics and Communication)	Laxmi Narain College of technology Indore (RGPV University)	2013	73.8
12th	Mathematics +Computer Science	St. Mary's Convent S.S secondary School Dewas (CBSE Board)	2009	71.6
10th	NA	St. Mary's Convent S.S secondary School Dewas (CBSE Board)	2007	85.2

Project details:

Project 1:

Project Name	C090 Migration to Raincode	Start Date	07/03/2023
---------------------	----------------------------	-------------------	------------

PROJECT DESCRIPTION:

- C090 Migration where mainframe legacy application was migrated to azure cloud on raincode as target environment.
 - 16 applications in total were migrated as part of this project for John Hancock client.
 - Setting up of individual AKS Container for each batch and online applications. Moving from monolithic architecture to microservices was innovative, but this is one of the rarest combinations and experimental to meet Client's requirement and were successful in implementing this for about 1200 batch jobs.
- Contributed for the migration of the biggest chunk of applications which were indeed complex as well
 - Code changes and tested jobs as per the requirement of target environment .
 - Supported dark launch activity(prod parallel run), warranty support and post implementation extended support.
 - Learned new technologies and resolved multiple issues. Provided training and support to junior team members facilitating knowledge transfer and skill development.

Project Name	LTA-Benefits NM	Start Date	07/03/2022
---------------------	-----------------	-------------------	------------

PROJECT DESCRIPTION:

- Northwestern Mutual is an American financial services mutual organization based in Milwaukee, Wisconsin. Its products include life insurance, permanent life insurance, disability income, and long-term care insurance; annuities; investments.
 - We are responsible for BAS application Maintenance and support which is used for life policies , claim setup and payments for same.
- Working in Agile Methodology.
 - Successfully delivered and implemented number of user stories in production.
 - Worked on user stories which involves forms and letter changes using mail merge.
 - Worked on deployment activities like creating CR, checkout plan, TCR and code review.
 - Leading the team of two members.

Project Name	SOL	Start Date	15/11/2020
Client	RSA	End Date	25/02/2022
Project Location	Worked at client location Stockholm Sweden for 8 Months		
<u>PROJECT DESCRIPTION:</u> • RSA Insurance Group plc (trading as RSA, formerly Royal and Sun Alliance) is a British multinational general insurance company headquartered in London, United Kingdom • The SOL project purpose is to implement a core policy solution for PA based on the same structure and platform a Motor and House & Content (HAC). The implementation of SOL is part of the overall IT roadmap for trygghansa policy system to deliver business benefits in short and middle term.			
Role / Responsibilities	• Working in Agile Methodology. • Successfully delivered and implemented number of user stories in production. • New module written for conversion of OLD policies from PA system to New SOL system. • Code changes done based on the conversion rules as per business requirement. • Test cases written and performed Unit testing. • Extensive use of DB2 database.		

Project Name	RSA	Start Date	21/12/2016
Client	RSA	End Date	15/11/2019
Project Location	Sweden		
<u>PROJECT DESCRIPTION:</u> • RSA Insurance Group plc (trading as RSA, formerly Royal and Sun Alliance) is a British multinational general insurance company headquartered in London, United Kingdom • Worked for Motor application in RSA system. • Motor system in Trygg Hansa is the Biggest and most complex system of all existing systems in the Trygg Hansa world. The system is a huge collection of both the Online screens and a strong set of Batch Jobs (JCL's). • This system is implemented in 1995. • Worked for Konto application which handles finance for all policy system.			

Role / Responsibilities	• Working in Agile Methodology. • Successfully delivered and implemented number of user stories in production. • Developed tested and implemented code for creating file for new leasing customer. • Written codes from scratch for project. • Preparing test plan and test documents UTP and UTR. • Performing Unit testing. • Preparing JCL's for system testing. • Used DB2 database in Motor application. • Involved in data analysis for CRM tool. • Collecting and updating policy data from different tables. • Involved in daily production support. • Analyzing and solving abends. • Solving critical incidents.

Project Name	RS6	Start Date	April 2016
Client	Boots UK	End Date	Nov 2016
Project Location	Nottingham UK		

PROJECT DESCRIPTION:

- Boots UK Limited (formerly Boots the Chemists Limited), trading as Boots, is a pharmacy chain in the United Kingdom and Ireland, with outlets in most high streets, shopping centers and airport terminals.
- RS6 was a migration project from mainframe to SAP technology.

Role / Responsibilities	• Understanding projects requirements. • Followed SDLC life cycle. • Build the plan, Design (build the solution proposal and functional spec) • Developed code in DB2 database. • Coding new modules from spec and also making amendments in existing module. • Preparing test plan and test documents UTP and UTR. • Performing Unit testing. • Preparing JCL's for system testing.
--------------------------------	---

Project 5:

Project Name	Accum Load	Start Date	April 2015
Client	Anthem	End Date	March 2015
Project Location	USA	Team Size handled (If applicable)	3

PROJECT DESCRIPTION:

- Anthem Inc. is an American health insurance company founded in the 1940s, prior to 2014 known as WellPoint, Inc. It is the largest for-profit managed health care company in the Blue Cross and Blue Shield Association
- Accum load project is data transfer project from different vendors to anthem.
- Data consist of member data and accum data which needs to be loaded in production environment of anthem after doing analysis from requirement questionnaire.

Role / Responsibilities	Working independently from requirement analysis till closure in the Accum load track from offshore, interacting directly with clients and onsite. Accum load or accum transfer request we get the input file from business, based on the requirement questionnaire and input file need to create the preload report and mismatch report using certain sets of job. Once we get the approval for preload report from client, need to load the data in production and validate the same.
--------------------------------	--

Project Name	WGS Claims SSCR (Small System Change Request)	Start Date	Jan 2014
Client	Anthem	End Date	April 2015
Project Location	USA	Team Size handled (If applicable)	3

PROJECT DESCRIPTION:

- Anthem Inc. is an American health insurance company founded in the 1940s, prior to 2014 known as WellPoint, Inc. It is the largest for-profit managed health care company in the Blue Cross and Blue Shield Association
- WGS SSCR is as Maintenance project where we maintain or modify the code/system as per the client requirements.

Role / Responsibilities	• Build the plan, Design (build the solution proposal and functional spec) • Debugging of code using IBM debug tool (DT). • Designing the document, Coding, creating reports. • Using Changeman for creating, updating packages containing modules. • Worked with claims processing (logging claims, processing in PAC and Image till finalization and history update) through online screen and batch jobs. • Using file manager for copying, updating, data files. • Creating the test plan document and execute various test cases.
--------------------------------	--

	• Performed Unit testing (online and batch) and delivering the test results. • Worked on various SIT issues that were reported by analyzing the defects through debug or by code analysis. • Interacting with Onsite to get clarifications on the requirements which spanned across various systems within WellPoint. • Participate in anchor activity and release support. • Involved in giving Knowledge transfer session to junior and new members of the team.
